- Java (Advance)
- Python (Advance)
- MongoDB
- Oracle SQL
- HTML
- CSS
- JavaScript

PROJECTS

Android Planner App
Developer
July 2025 – September 2025
Description: The Android planner application features secure user login with hashed password, vacations and excursions management, and a report generator.
Used: Java, Android Studio, Room Database, JUnit, GitLab

- Implemented secure login with password hashing to protect user credentials.
- Developed and enforced add, edit, and manage vacation and excursion functionalities.
- Built reporting functionality to generate vacation summaries within a date range.
- Applied Room Database with DAOs and Repository pattern for structured, scalable data handling.
- Created and executed JUnit tests to validate authentication logic and ensure application reliability.
